

**ACETONE 99.7%****DESCRIPTION**

Technical acetone is produced by cumene process simultaneously with phenol production.

**SPECIFICATIONS**

High superior grade:

Appearance - colorless transparent liquid

Acetone amount, %, not less than .....	99,75
Density, $\rho_{4}^{20}$ , g/cm <sup>3</sup> .....	0,789-0,791
Water amount, %, not more than .....	0,2
Methyl alcohol amount, %, not more than.....	0,05
Stability to potassium magnate oxidation, not less than.....	4

**APPLICATION**

Acetone is used in synthesis of acetic anhydride, diphenylolpropane and other organic products and also as a solvent of nitrocellulose enamels and varnishes.

**STORAGE, TRANSPORTATION**

The acetone is transported in rail tank cars.

**MANUFACTURER**

«Omsky kautchuk» Joint Stock Company – Russia
