

Product: **Phthalic Anhydride Flakes****1. Technical Description**

Phthalic Anhydride has the following chemical structure.

1, 2-Isobenzofurandione

Molecular Weight : 148.11

2. Specification

Parameter	Unit	Value	Test Method
Appearance	-	White Cry-stallion	-
Solidification Point	°C	Min. 130.8	ASTM D 1493
Molten Color	APHA	Max. 20	ASTM D 3366
Purity	%	Min. 99.8	G/C
Phthalic Acid	%	Max. 0.2	JIS K 4128

3. Application

Phthalic Anhydride is used for manufacture of Plasticizer (DOP, DINP, DIDP, etc), Alkyd Resin, Unsaturated Polyester Resin, Pigment, and Other chemicals.

4. Packing

25 kgs net in a P.P woven bag.

5. Special features of the DCC Phthalic Anhydride Plant

- An automatic production system guarantees uniform quality in all products.
- The latest in production facilities and low energy process result in a highly efficient production system.
